---

## RELEVANT PROJECTS

**Sellify (2021):** Worked collaboratively on a team of six in a startup event by GDSC Loyola entitled, *Playground*, to develop a web application that aims to hasten live selling experience. This project is unfortunately not being continued for by September 2021 due to numerous reasons. This project helped me improve my full-stack web development skills and learn working on Facebook APIs.

**Intellipaper (2022):** A project for Software Engineering class. Worked collaboratively with three other members as a leader. This web application aims to lighten up the workload of students and professionals on their research project with various features including reference citation generator, task manager, real-time collaboration, file storage, etc.
